Unit 4 Searching
02 “Fetch!”

Names:

Hour:

Directions

In some ways, a search engine is like a well-trained dog. It will fetch what you want, but only if you use the right commands. Although single words are better commands for dogs, more words are better for search engines. Your task is to answer the questions below by using the search engine given.

Do not use “Wikipedia” for a search result!

1. What foods are toxic to dogs?
Our search site is... AltaVista
Use just one keyword in your first search.
The number of results/hits is...
Is the answer found in the first three results?
Four toxic foods are...

1. What foods are toxic to dogs?
Our search site is... AltaVista
Use just two keywords in your second search.
The number of results/hits is...
Is the answer found in the first three results?
Four toxic foods are...
